

The Water Cycle Diagram

Use a piece of copy paper

On the Front:

Describe each part of the water cycle

Name: _____
Per: _____

Describe the Water Cycle

- ① From surface water (oceans, lakes, rivers) to the Atmosphere
 - **Evaporation** (liquid water to water vapor)
- ② From living things (the biosphere) to the Atmosphere
 - **Transpiration** (liquid water to water vapor)
- ③ In the Atmosphere, water vapor turns into little droplets
 - **Condensation** (water vapor to liquid water)
- ④ From the Atmosphere, to the surface
 - **Precipitation** (rain, snow, sleet, and hail)
- ⑤ From the surface to the ocean and lakes
 - **Runoff** (streams and rivers)
- ⑥ From the surface to ground water
 - **Ground Infiltration** (surface water seeps into the ground)

On the Back:

Diagram each part of the water cycle
